Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record fail to anticipate or render obvious the claimed data reproducing method for reproducing data corresponding to a state-transition pass selected as being most likely according to a Viterbi decoding algorithm from a reproduction signal supplied from a recording medium, the method comprising the steps of:

detecting at least one state of said reproduction signal according to data used for selecting said state-transition pass;

calculating an average value of said reproduction signal in each of said at least one state detected by said step of detecting;

determining at least one expected value according to said average value so as to allow the expected values to follow a fluctuation amount of a direct current component of said reproduction signal; and

supplying said expected value to a Viterbi detector such that the expected value is used in the Viterbi decoding algorithm as claimed in claim 1,7 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
